Industry-leading <0.125ms click latency

Upgraded with a HIGH-SPEED USB microcontroller

A HEAVY-HITTER THAT WEIGHS ANYTHING BUT.

**71G LIGHTWEIGHT DESIGN:** Enjoy faster and smoother control with one of the lightest gaming mice in the market. Weighing just 71g, what's even more impressive is that it achieves its weight without compromising on the build strength of its ambidextrous form factor.

**ADVANCED ON-BOARD MEMORY:** Be ready to compete anywhere with up to 5 stored profiles that give you access to optimal keybinds, macros, and twice the inputs via the Razer HyperShift function.

**RAZER™ SPEEDFLEX CABLE:** Woven for greater flexibility and designed to produce minimal drag, you'll be able to perform quicker, smoother swipes for tighter mouse control.

**INJECTION-MOLDED RUBBER SIDE GRIPS:** For more secure swipes, the mouse has rubber grips that fully cover its left and right side—molded as part of the shell to ensure they never peel off.

**100% PTFE MOUSE FEET:** This ambidextrous esports gaming mouse is able to glide across any surface thanks to mouse feet made from the purest, highest grade of PTFE

**8 PROGRAMMABLE BUTTONS:** Fully configurable via Razer Synapse 3, the 8 programmable buttons let you access macros and secondary functions for an advanced degree of control.
